

# Intelligent Cloud Monitoring

Data Sheet

As companies move to cloud adoption, the sudden growth in new cloud services requires resources to manage and monitor your cloud estate.

## Support when you need it

We provide a flexible, non-intrusive cloud monitoring service for your AWS infrastructure as and when you need it. We monitor your critical infrastructure to ensure uptime and service for your users, while also freeing up your resources for business critical projects.

## Features

- Identify and raise alerts or issues in real-time
- Choose when you need cover, whether you need out of hours support, holiday cover or 24/7 monitoring
- No need to alter your infrastructure and no agents to deploy or manage

## Benefits

- We become an extension of your existing team
- Get the support you need while maintaining control of your infrastructure and billing
- Flexible service tailored to your requirements
- Detailed, regular reporting, giving you the insights you need to make informed decisions about your infrastructure

## Why Exception?

- Strong track record of achievement
- Commitment to delivering high quality solutions that make a real difference
- Provision of tools and accelerators to speed and optimise your cloud journey
- Intelligent monitoring to ensure maximum system availability

## A Trusted Cloud Partner
